

Lesson 2 - Attach the hessian to your wooden frame

Tools and materials needed; wooden frame, staple gun, hessian, hammer, and scissors.

Cut a piece of hessian to size ready for stapling. It needs to be 1" bigger than your frame, so if your frame is 20" x 16", cut your hessian to 21" x 17".

You will be attaching the hessian on top of the elasticated webbing. Cut a piece of hessian an inch bigger than the size of your frame

Place the hessian on top of the wooden frame. Ensuring there is an overlap around the edge. Watch Lesson 2 video for detailed instructions.
