

Measurements for your piped box cushion

Please bring these three measurements with you to the workshop. You will need to know them to calculate your fabric.

If you need a foam inner for your project please confirm this when booking onto the workshop. Letting me the know the measurements

Width x Height x Depth

Calculating how much fabric for your piped box cushion

You will need the following pieces of fabric to make up a piped box cushion.

- Top and bottom plates
- Piping x 2 for top and bottom
- Zip panel
- Border

If you confirm your cushion size I will calculate the fabric required for your project. If it is your first project I would recommend making in a plain fabric.
